(d) "Outstanding state resource water" has the meaning set forth in IC 13-11-2-149.6.

(e) "Watershed" has the meaning set forth in IC 14-8-2-310.

(f) The board may designate a water body as an outstanding state resource water by rule if the board determines that the water body has a unique or special ecological, recreational, or aesthetic significance.

(g) Before the board may adopt a rule designating a water body as an outstanding state resource water, the board must consider the following:

(1) Economic impact analyses, presented by any interested party, taking into account future population and economic development growth.

(2) The biological criteria scores for the water body, using factors that consider fish communities, macro invertebrate communities, and chemical quality criteria using representative biological data from the water body under consideration.

(3) The level of current urban and agricultural development in the watershed.

(4) Whether the designation of the water body as an outstanding state resource water will have a significant adverse effect on future population, development, and economic growth in the watershed, if the water body is in a watershed that has more than three percent (3%) of its land in urban land uses or serves a municipality with a population greater than five thousand (5,000).

(5) Whether the designation of the water body as an outstanding state resource water is necessary to protect the unique or special ecological, recreational, or aesthetic significance of the water body.

 2 state resource water to the interim study committee on environmental
 3 affairs established by IC 2-5-1.3-4 in an electronic format under
 4 IC 5-14-6. not later than one hundred twenty (120) days after the rule
 5 regarding the designation is finally adopted by the board.

6 (j) Notwithstanding any other provision of this section, the
 7 designation of an outstanding state resource water in effect on January
 8 1, 2000, remains in effect.

9 (k) For a water body designated as an outstanding state resource
 10 water, the board shall provide by rule procedures that will:

11 (1) prevent degradation; and

12 (2) allow for increases and additions in pollutant loadings from an
 13 existing or new discharge if:

14 (A) there will be an overall improvement in water quality for
 15 the outstanding state resource water as described in this
 16 section; and

17 (B) the applicable requirements of rules adopted by the board
 18 under this section are met.

19 (l) The procedures provided by rule under subsection (k) must
 20 include the following:

21 (1) A definition of significant lowering of water quality that
 22 includes a de minimis quantity of additional pollutant load:

23 (A) for which a new or increased permit limit is required; and

24 (B) below which antidegradation implementation procedures
 25 do not apply.

26 (2) Provisions allowing the permittee to choose application of one

27 (1) of the following for each activity undertaken by the permittee
 28 that will result in a significant lowering of water quality in the
 29 outstanding state resource water:

30 (A) Implementation of a water quality project in the watershed
 31 of the outstanding state resource water that will result in a
 32 overall improvement of the water quality of the outstanding
 33 state resource water.

34 (B) Payment of a fee, not to exceed five hundred thousand
 35 dollars (\$500,000), based on the type and quantity of increased
 36 pollutant loadings, to the department for deposit in the
 37 outstanding state resource water improvement fund established
 38 under section 14 of this chapter for use as permitted under that
 39 section.

40 (3) Criteria for the submission and timely approval of projects
 41 described in subdivision (2)(A).

(5) Use of water quality data that is less than seven (7) years old and specific to the outstanding state resource water.

(6) Criteria for using the watershed improvement fees to fund projects in the watershed that result in improvement in water quality in the outstanding state resource water.

(m) For a water body designated as an outstanding state resource water after June 30, 2000, the board shall provide by rule antidegradation implementation procedures before the water body is designated in accordance with this section.

(n) A water body may be designated as an outstanding national resource water only by the general assembly after recommendations for designation are made by the board and the interim study committee on environmental affairs established by IC 2-5-1.3-4.

(o) Before recommending the designation of an outstanding national resource water, the department shall provide for an adequate public notice and comment period regarding the designation. The commissioner shall present a summary of the comments and information received during the comment period and the department's recommendation concerning designation to the ~~interim study committee on environmental affairs established by IC 2-5-1.3-4~~ **house of representatives or senate committees on environmental affairs** in an electronic format under IC 5-14-6 not later than ninety (90) days after the end of the comment period. The committee shall consider the comments, information, and recommendation received from the department, and shall convey its recommendation concerning designation to the general assembly within six (6) months after receipt.

(p) This subsection applies to all surface waters of the state. The department shall complete an antidegradation review of all NPDES general permits. The department may modify the general permits for purposes of antidegradation compliance. After an antidegradation review of a permit is conducted under this subsection, activities covered by an NPDES general permit are not required to undergo an additional antidegradation review. An NPDES general permit may not be used to authorize a discharge into an outstanding national resource water or an outstanding state resource water, except that a short term, temporary storm water discharge to an outstanding national resource water or to an outstanding state resource water may be permitted under an NPDES general permit if the commissioner determines that the discharge will not significantly lower the water quality downstream of the discharge.

(q) Subsection (r) applies to:

(1) an application for an NPDES permit subject to

IC 13-15-4-1(a)(2)(B), IC 13-15-4-1(a)(3)(B), or
IC 13-15-4-1(a)(4); or

(2) an application for a modification or renewal of an NPDES
permit;

that proposes new or increased discharge that would result in a
significant lowering of water quality as defined in subsection (l)(1).

(r) For purposes of an antidegradation review with respect to an
application referred to in subsection (q), the applicant shall
demonstrate at the time the application is submitted to the department,
and the commissioner shall review:

- (1) an analysis of alternatives to the proposed discharge; and
- (2) subject to subsection (s), social or economic factors indicating
the importance of the proposed discharge if alternatives to the
proposed discharge are not practicable.

(s) Subject to subsection (t), the commissioner shall consider the
following factors in determining whether a proposed discharge is
necessary to accommodate important economic or social development
in the area in which the waters are located under antidegradation
standards and implementation procedures:

- (1) Creation, expansion, or maintenance of employment.
- (2) The unemployment rate.
- (3) The median household income.
- (4) The number of households below the poverty level.
- (5) Community housing needs.
- (6) Change in population.
- (7) The impact on the community tax base.
- (8) Provision of fire departments, schools, infrastructure, and
other necessary public services.
- (9) Correction of a public health, safety, or environmental
problem.
- (10) Production of goods and services that protect, enhance, or
improve the overall quality of life and related research and
development.
- (11) The impact on the quality of life for residents in the area.
- (12) The impact on the fishing, recreation, and tourism industries.
- (13) The impact on threatened and endangered species.
- (14) The impact on economic competitiveness.
- (15) Demonstration by the permit applicant that the factors
identified and reviewed under subdivisions (1) through (14) are
necessary to accommodate important social or economic
development despite the proposed significant lowering of water
quality.

(16) Inclusion by the applicant of additional factors that may enhance the social or economic importance associated with the proposed discharge, such as an approval that:

(A) recognizes social or economic importance; and

(B) is given to the applicant by:

(i) a legislative body; or

(ii) other government officials.

(17) Any other action or recommendation relevant to the antidegradation demonstration made by a:

(A) state;

(B) county;

(C) township; or

(D) municipality;

potentially affected by the proposed discharge.

(18) Any other action or recommendation relevant to the antidegradation demonstration received during the public participation process.

(19) Any other factors that the commissioner:

SECTION 152. IC 13-18-3-2.5, AS AMENDED BY P.L.54-2005, SECTION 4, IS AMENDED TO READ AS FOLLOWS [EFFECTIVE JULY 1, 2026]: Sec. 2.5. (a) A CSO wet weather limited use subcategory is established for waters affected by receiving combined sewer overflows, as specified in an approved long term control plan. The CSO wet weather limited use subcategory applies to a specific water body after implementation of an approved long term control plan for the combined sewer system whose overflow discharges affect those waters is implemented and the conditions of subsection (b) are satisfied. The following requirements apply to the CSO wet weather limited use subcategory:

(1) The water quality based requirements associated with the CSO wet weather limited use subcategory that apply to waters affected by wet weather combined sewer overflows are determined by an approved long term control plan for the combined sewer system. The water quality based requirements remain in effect during the time and to the physical extent that the recreational use designation that applied to the waters immediately before the application to the waters of the CSO wet weather limited use subcategory is not attained, but for not more than four (4) days after the date the overflow discharge ends.

(2) At all times other than those described in subdivision (1), the water quality criteria associated with the appropriate recreational use designation that applied to the waters immediately before the application to the waters of the CSO wet weather limited use subcategory apply unless there is a change in the use designation as a result of a use attainability analysis.

(b) The CSO wet weather limited use subcategory applies if:

(1) the department has approved a long term control plan for the NPDES permit holder for the combined sewer system;

(2) the approved long term control plan:

(A) is incorporated into:

(i) the NPDES permit holder's NPDES permit; or

(ii) an order of the commissioner under IC 13-14-2-6;

(B) satisfies the requirements of section 2.3 of this chapter;

and

(C) specifies the water quality based requirements that apply

1 to combined sewer overflows during and immediately
 2 following wet weather events, as provided in subsection (a)(1);
 3 (3) the NPDES permit holder has implemented the approved long
 4 term control plan; and
 5 (4) subject to subsection (c), 40 CFR 131.10, 40 CFR 131.20, and
 6 40 CFR 131.21 are satisfied.

7 (c) For purposes of subsection (b)(4), 40 CFR 131.10 may be
 8 satisfied by including appropriate data and information in the long term
 9 control plan.

10 (d) The department shall implement the CSO wet weather limited
 11 use subcategory and associated water quality based requirements under
 12 this section when the subcategory and requirements are approved by
 13 the United States Environmental Protection Agency. The department
 14 shall seek approval of the United States Environmental Protection
 15 Agency in a timely manner.

16 (e) The NPDES permit holder shall monitor its discharges and the
 17 water quality in the affected receiving stream periodically as provided
 18 in the long term control plan. The NPDES permit holder shall provide
 19 all such information to the department.

20 (f) In conjunction with a review of its long term control plan under
 21 section 2.4 of this chapter, the NPDES permit holder shall review
 22 information generated after the use attainability analysis was approved
 23 by the department to determine whether the conclusion of the use
 24 attainability analysis is still valid. The NPDES permit holder shall
 25 provide the results of the review to the department.

26 (g) The board shall adopt rules under IC 13-14-8 and IC 13-14-9 to
 27 implement this section. ~~before October 1, 2006.~~

 35 reasonably possible, but **not later than five (5) years from the date**
 36 **applicable standards, limitations, or other requirements are**
 37 **incorporated into the permit and** may remain in effect as long as the
 38 National Pollutant Discharge Elimination System (NPDES) permit

 2 implementation of the long term control plan. The schedules of
 3 compliance:

- 4 (1) may exceed time frames authorized under 327 IAC; and

 10 successive permit term, to the maximum duration as provided in
 11 subsection (c). The permit shall specify that the schedule of compliance
 12 lasts beyond the term of the permit.

13 (e) Upon request of the permittee, the department shall modify
 14 NPDES permits containing water quality based requirements
 15 associated with combined sewer overflows to provide schedules of
 16 compliance as provided in subsection (c).

 6 when necessary and feasible as determined by a qualified
 7 environmental professional.

8 ~~(d)~~ (e) The commissioner may take action under subsection (a)
 9 without having received and reviewed the initial site characterization
 10 if the commissioner reasonably believes that the release from the
 11 underground storage tank or aboveground storage tank creates a threat
 12 to human health or the environment sufficient to necessitate action
 13 under subsection (a) before the initial site characterization is submitted
 14 to the department.

15 ~~(e)~~ (f) If the commissioner:

16 (1) requires corrective action under subsection (a); and
 17 (2) determines that the corrective action will be done properly and
 18 promptly by the owner or operator of the underground storage
 19 tank or aboveground storage tank from which the release occurs;
 20 the commissioner may enter into an agreed order with the owner or
 21 operator to implement necessary corrective action.

 29 to protect human health and the environment; and

30 (2) at least one (1) of the following conditions exists:

31 (A) A person cannot be found not later than ninety (90) days
 32 after a suspected or confirmed release is identified (or a

 36 aboveground storage tank;

37 (ii) subject to the rules concerning corrective action; and

38 (iii) capable of properly carrying out corrective action with
 39 respect to the release.

40 (B) An existing situation requires prompt action by the
 41 commissioner under this section to protect human health and
 42 the environment.

- (1) issue an order under IC 13-14-2-7 or IC 4-21.5-4; or
- (2) proceed under IC 13-14-2-6;

to require the owner or operator of an underground storage tank or aboveground storage tank to undertake corrective action with respect to any release of a regulated substance.

(b) Except as provided in subsection (d), the commissioner may not, with respect to a release of petroleum from an underground storage tank or aboveground storage tank:

- (1) take action under subsection (a); or
- (2) if a reportable quantity of the released petroleum remains or may remain underground at the site of the underground storage tank or aboveground storage tank:
 - (A) request that the owner or operator of the underground storage tank or aboveground storage tank execute a restrictive covenant (as defined in IC 13-11-2-193.5) applying to the site of the underground storage tank or aboveground storage tank;
 - (B) make a determination of no further action being required at the site of the underground storage tank or aboveground storage tank; or
 - (C) approve closure, or its equivalent, of the site of the underground storage tank or aboveground storage tank;

unless the commissioner has received and reviewed the initial site characterization of the site of the release or an alternative evaluation is prepared for submittal to the commissioner in accordance with subsection (c) **and an evaluation of potential remedial activities to achieve remedial objectives including closure options, environmental deed restrictions, and remediation methods to achieve a no further action determination, including estimated costs and time frames sufficient for the commissioner to evaluate the adequacy of the proposed response.**

(c) When necessary and feasible as determined by a qualified environmental professional, an initial site characterization shall include:

- (1) site-specific geologic information obtained from a minimum of three (3) continuously sampled soil borings; and
- (2) hydrogeologic information, including depth to ground water and ground water flow directions and gradients, obtained from a minimum of three (3) monitoring wells screened across the water table.

A qualified environmental professional, on behalf of the owner or operator of an underground storage tank or an aboveground storage tank from which there has been a release of petroleum, may submit for approval by the commissioner an alternative procedure for initial site characterization and request a waiver of the requirements in this subsection. The commissioner may approve the request for a waiver and alternative procedure only if the alternative procedure provides substantially equal protection for human health and the environment.

If an initial site characterization does not define the nature and extent of the contaminant plume, additional investigation shall be performed when necessary and feasible as determined by a qualified environmental professional.

(d) The commissioner may take action under subsection (a) without having received and reviewed the initial site characterization if the commissioner reasonably believes that the release from the underground storage tank or aboveground storage tank creates a threat to human health or the environment sufficient to necessitate action under subsection (a) before the initial site characterization is submitted to the department.

(e) If the commissioner:

- (1) requires corrective action under subsection (a); and
- (2) determines that the corrective action will be done properly and promptly by the owner or operator of the underground storage tank or aboveground storage tank from which the release occurs;

the commissioner may enter into an agreed order with the owner or operator to implement necessary corrective action."
